Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to communications: Application filed on 03/15/2004.
2. Claims 1-22 are presented for examination.

Allowable subject matter

3. Claims 11, 12 and 16-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 6, 7, 13, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
5. Claims 11, 12, 16, 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2168

Claim 11, lines 29 and 33 recites "(first variable), (second set of metadata)".

There is insufficient antecedent basis for this limitation in this claim; it is unclear whether the limitation within the bracket is to be included in the claim.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8-10, 18-22 are rejected under 35 U.S.C. 101 as being directed to nonstatutory subject matter because, "An apparatus" is recited; the claimed apparatus only contains a software component, however there is lack of hardware component.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-5 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Emerick, Charles (Pub. No. U.S 2003/0084035).

For claim 1, Charles teaches “a data search system for searching data wherein each of plural metadata includes at least a global unique identifier, a data index and a description sentence of base data, said unique identifier being an identifier for identifying a specific object, each of said metadata being associated with corresponding base data by said data index and being associated with said object by said global unique identifier” (See paragraph [0036]), the system comprising:

“a metadata store for storing metadata”(See paragraph [0035]);

“an input for entering said global unique identifier” (See paragraph [0036]);

“a metadata reader for reading a set of metadata including said entered global unique identifier from said metadata store(See paragraph [0007])

“a metadata searcher for searching for a specific metadata by searching said read out set of metadata for a specific description sentence”(See paragraph [0035])

For claim 2, Charles teaches “wherein a plurality of said metadata includes the same global unique identifier”(See paragraph [0063])

For claim 3, Charles teaches “means for capturing said data index from the specific metadata”(See paragraph [0009], [0012]) and means for capturing base data corresponding to said specific metadata based on said data index”(See paragraph [0068]).

Art Unit: 2168

For claim 4, Charles teaches "means for capturing said data index from the specific metadata; and means for capturing base data corresponding to said specific metadata based on said data index"(See paragraph [0009], [0012])

For claims 5 and 10, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 1 and are similarly rejected.
